## Will Gravel Roads With Tax Arrears

At the meeting of the Mountain View Council held last week, it was decided to make road improvements under the government scheme of collecting arrears of taxes. Under this scheme the farmer who works on the roads receives two-thirds of the amount due in credit for arrears of municipal taxes and one third in treasury certificates.

The amount of the government grant allotted for this purpose to Mountain View will be \$2,300.00 which will be paid in treasury certificates to be paid to farmers.

This will mean that \$6,900.00 will be available to be expended on roads in the municipality under the scheme.

A large percentage of the work will be gravelling the roads and about \$2,000.00 has been allocated to the Didsbury-Three Hills market road, \$2,000.00 on the Olds-Trochu market road and the balance of the amount on side roads. The Government also allows 20 per cent of cost of material to be paid from the grant.

The Council approved of the plan to build a road going three quarters of a mile north of Olds on the west side of the railroad track.

The secretary reported having received advice from the department that a new bridge would be built between section 13 and 14, 27.4 on the Lone Pine road south of the Spragg place.

The amount of relief paid during June was reported to be \$204.

## Legion Will Attend Unveiling Ceremonies

Invitations have been received by the local branch of the Canadian Legion to attend the unveiling of the War Memorials at Olds and Crossfield.

The ceremonies at Olds will be held Saturday, July 22 at 11 a.m., while the ceremonies at Crossfield will take place on Sunday, July 30, at 2:30 in the afternoon. Fall-in at Crossfield 2:15. Medals will be worn.

Brigadier General G. R. Pearkes will officiate at each service, and it is hoped that as many Returned Men of the Didsbury district as possible will attend the ceremonies at both points.

Regular Meeting of the Canadian Legion, Saturday, July 29th, 8:30 p.m. "On the Town."

## Crystal Dairy Tops List at Brandon.

Crystal Dairy headed the Alberta creameries at the Brandon Exhibition when they took 1st prize for June made butter in competition with creameries in all parts of Canada.

At Calgary they took 2nd prizes for May and June made butter.

The local creamery is competing at every major exhibition held in Canada this season.

We are pleased to report that this creamery is keeping up its reputation of being among the best makers of butter in the Dominion.

This is also a compliment to the cream producers of the district as we are informed that all the butter made for competition has been made from cream taken from the regular delivery, no special appointment having been made at any time.

## WEDDINGS

### BIRDSALL-KNUDSON

An interesting wedding took place at St. Stephen's College Chapel, Edmonton, on Saturday evening, July 15, when Jean Euphemia Knudson and Mr. John Everett Birdsall were united in marriage.

The younger daughter of Mr. and Mrs. Thomas A. Knudson, the bride is well known in musical circles in Edmonton and throughout the province. She has the degrees of A.T.C.M. and L.R.S.M. and has won festival honors several years in the province.

Mr. Birdsall, son of Mr. and Mrs. W. E. Birdsall, of Didsbury, is a graduate of the University of Alberta, from where he obtained the degree of B.Sc. in Agriculture. He is now connected with the Department of Field Crops at the University.

Attending the bride was Miss Margaret Ball, while Mr. William Birdsall, Didsbury, was best man.

Mr. Birdsall and his bride left, following the reception, for a honeymoon at Vancouver and Victoria.

On their return Mr. and Mrs. Birdsall plan to make their home in Edmonton.

### SCHEER-KLINCK

A quiet wedding was solemnized at Macleod on July 10, at 8 p.m., when Ruby Mae, youngest daughter of Mrs. Daniel Klinck, became the bride of Mr. Alvin B. Scheer, son of Mrs. H. G. Scheer, of Strathmore. Rev. A. E. Larke officiated.

Following the ceremony the couple left by motor for Yellowstone Park. On their return they will reside at Carstairs.

### LYNCH-STANTON-STEWART

A pretty wedding took place at St. Stephen's Church, Calgary, on Saturday, July 8th, when Harriet, daughter of Mr. and Mrs. H. D. R. Stewart, became the bride of Mr. Hardwick Lynch-Stanton, barrister, of Didsbury.

Mrs. Frank Watkins was matron-of-honor, while Mr. J. V. H. Milvain, Calgary, attended the groom.

Following the ceremony a reception was held at the home of the bride's parents, after which Mr. and Mrs. H. Lynch-Stanton left by motor for Banff and points south.

## Didsbury Fair Next Wednesday

The 34th Annual Didsbury Fair and Exhibition will be held next Wednesday, July 26, with Didsbury Calf Club Exhibition in connection.

The secretary of the Agricultural Society, Mr. C. E. Reiber, reports that a larger number of entries have been received than for several years past and they are still coming in. Entries close at 10 p.m. this Saturday, July 22.

The Calf Club expects to have a good exhibit of dairy calves on show and the competition in this class should be extremely close, as we have some excellent young prospective dairy farmers in the district. All dairy breeds will be on show in the Calf Club exhibit.

In the domestic science department of the fair, entries are filling up very well, and indications point to a better showing in this department than for some years. Entries in the stock department continue steady and an extra good showing is promised.

Judging of exhibits, both stock and inside exhibits, will commence at 10 a.m. Three stock judges will be supplied by the Provincial Department of Agriculture. Outside judges will be obtained for the domestic exhibits.

In the entertainment line a full program of sports has been arranged for the afternoon, including two horse racing events, the half mile open run and the half mile run for 14 3 and under, the awards being for the best two winners out of three heats. Children's sports are also on the program, with good prizes. A softball tournament with a first and second prize of \$20 and \$10 has been arranged, and teams wishing to compete should make entries with Mr. Leonard Bersch not later than Saturday of this week.

Midway attractions are being supplied by Rose's Shows and Elliott's Rides.

Downtown attractions include a movie show at the Opera House "Tundra," an epic of pictorial grandeur and savage thrills filmed in the Arctic; a new thrilling and breath-taking entertainment event. There will be two performances in the early evening.

To top off a worth while day, the Didsbury Calf Club is sponsoring a big dance, following the show, with the popular Duke Dodd and his Red Aces supplying the music.

### Additional Prize for Fair.

Following is an additional special prize for the fair, received too late for publication in the prize list: W. J. Fulkert:

For Best three-quarter Heavy Horse Type—\$5.00.

Pete Miquelen, who has been relieving at Exshaw, will return and take over the Carstairs station on Friday.

Mr. Arthur Evans left Wednesday for a trip to Toronto and New York.

## Leaves Keys in Car, Finds Car Missing

On going out early Monday morning, Dave Edwards was surprised to find that his car, which he parked in the driveway alongside his house on Sunday night, was missing.

He was awakened about 2 o'clock in the morning by the sound of a car being driven away but did not investigate as he thought it was one of his neighbour's but in the morning he discovered it was his own car taking its departure.

Mr. Edwards says that it was the first time he had ever left the key in the car, having forgotten it when he changed his mind about taking a drive the evening before.

The loss was immediately reported to local police and Constable Dunlop, R.C.M.P. Olds, who investigated.

Word was received Tuesday evening that the car had been found at Lamont, north of Edmonton, but that the culprits had not yet been located.

## Exciting Tale Of Mounties, at the Movies

"Heart of the North," the Warner Bros. production in Technicolor which comes to the Opera House this weekend, is a thrill-packed and completely authentic tale of that famous law enforcement body of the Canadian northwest, the Royal Canadian Mounted Police.

Produced on the lavish scale characteristic of all Warner Bros. Technicolor specials, the picture has all the elements required by first-rate outdoor film—adventure, action, suspense, the beauty and interest of unfamiliar landscapes, and a large cast of popular players.

Interwoven in a love theme whose interest is heightened by the fact that one of the girls represents the lure of civilization and sophistication, while the other represents all the appeal of the untamed wilderness.

### Successful Music Students.

The following young music students were successful in passing their examinations, conducted under the Royal College of Music regulations:

Grade IV Grammar of music pass: Nora Barrett, Mary Boorman, Margorie Burns, Jean and Mary Robertson.

Grade III, pass with credit: Betty Boorman (harmony).

Douglas Wordie also passed with honors his Grade VII pianoforte in the Toronto Conservatory of Music examination, and passed with first-class honors his examination in theory.

Douglas is to be congratulated on attaining the highest standing in his grade in the Calgary district.

## Obituary.

### MRS. EZRA SHERICK

In the death of Mrs. Ezra Sherick on Thursday, July 13, 1939, in her 62nd year, Didsbury lost another loyal pioneer who was well known for her pleasant smile and devoted life.

Cora Hunsperger was born in Greenwood, Michigan, U.S.A., on February 26, 1877, where she lived until coming to the Didsbury district with her mother in 1895 to join the other members of the family who preceded them in 1894.

The first wedding ceremony performed in the Didsbury district was that of Cora Hunsperger to Ezra Sherick on April 13th, 1898, at the home of her parents, Mr and Mrs William Hunsperger.

Mrs. Sherick resided in the district until her death at the old home-stead. For many years she was a member of the M.B.C. Church at Didsbury, where she was loved and respected for her Christian life. Through her endearing manner she acquired a host of friends and acquaintances who will sincerely regret her passing and sympathise with her sorrowing husband and family.

She leaves to mourn her loss, her husband, five sons, Verdo, of Carstairs, Russel, Gordon, Arnold and Ward, of Didsbury; three daughters, Mrs. Laura Dick, of James River, Edith and Marion at home, and eight grandchildren. One son, Clifford predeceased her in 1922. There are also three brothers, Allen, Abner and Alvin Hunsperger, of Didsbury, and one sister, Mrs. Mack Ryckman, of Chilliwick, B.C.

The funeral service was held at the M.B.C. Church on Saturday, July 15, conducted by Rev. C. J. Hallman, assisted by Rev. Oscar Snyder, Rev. A. Traub and Rev. D. C. Eby.

A male quartette sang "The Beautiful Land." Interment was made in the Didsbury cemetery.—(Contributed)

## A Declining Industry?

The fact that the Dominion Bureau of Statistics has reported a decrease of \$21,000,000 in 1938 in expenditures made in Canada by incoming tourists is something which should give pause for reflection and inquiry, in the hope that this falling off in national income on this account can be discovered and the remedy found.

Tourist traffic in Canada has become a national industry of great importance to the prosperity of the country in the past few years. While in one or two years prior to the depression era higher figures were shown, the revenue to the people of this Dominion from this source has been steadily rising since 1932, reaching a post-depression peak of \$294,682,000 in 1937 which, however, is still below the \$309,379,000 of the record year of 1929. The following year, 1938, marked a recession of \$21,000,000, the first, and it is to be hoped the last, decline since 1932.

What 1939 is to bring forth from this source is still in the lap of the gods, so far as the statisticians are concerned, but there seem to be some good reasons why the income lost in 1938 should be picked up and augmented.

### Some Helpful Factors

In the first place, the visit of King George and Queen Elizabeth drew thousands of Americans across the boundary to Canadian centres in May and June this year and this alone should go far towards balancing the differential between the 1937 and 1938 figures. Just about that time, and since, some improvement in business and economic conditions on both sides of the international boundary are reported, and this, in the ordinary course of events, should mean a material stimulus to this comparatively infant industry in Canada.

In some quarters it has been suggested that the condition of the roads in Canada, and particularly in the west, may have been partially responsible for the recent decline in the number of visitors from the United States, or at least in the amount of money they have spent here.

While there may be some truth in this diagnosis, it does not appear to be the major item in the reduction, since a break down of the figures indicates that the loss occasioned by a reduction in expenditures by tourists who came into Canada in 1938 by automobile is only approximately one million dollars.

While a reduction of one million dollars out of a total of \$181,000,000 spent by tourists on wheels from the U.S. in 1937 is not a serious matter, it is a trend in the wrong direction and there is some possibility that road conditions may be partly responsible. Moreover, had the increase from 1936 to 1937 been sustained in 1938, the income from American tourists on the road would have shown an increase of \$22,000,000 instead of decline of a million, or sufficient to offset the loss caused by the reduction of those who came in as visitors by boat, rail and aeroplane; in other words, an apparent loss of \$23,000,000.

### Need Improvement

Roads in Western Canada are not as good as they might be and probably would be if the provincial governments had the money to spend to put them in first class condition. On account of economic conditions they have necessarily been allowed to deteriorate and their condition has not been improved by a substantial increase in the past two or three years of heavy truck traffic.

Before these conditions are likely to be remedied and the highways put in a condition that will make them attractive to visitors from a country where good roads are the rule rather than the exception, it looks as if substantial sums of money will have to be expended and possibly further restrictions imposed on commercial trucks using the highways.

Taking into consideration the financial handicaps under which the provinces are laboring and the fact that the tourist industry is, or should be, a national asset, it would appear to be quite in order to suggest that further assistance might well be given by the federal government to the west to enable the provinces to embark on a more vigorous highway rehabilitation program than is now possible. It would seem conceivable that it would be money well expended and in time would pay dividends not only to the provinces themselves but the country as a whole.

Then, too, it should not be overlooked that such work could be planned and devised to furnish employment and wages for a large number of men now idle and who are now being sustained by the country without any return for their upkeep.

The importance of the tourist industry is well summed up by Claude C. Bonter in a recent issue of "Canadian Business" when he says:

"It may be unequivocally stated that revenues accruing to a country from tourist traffic represent not gains in the country's wealth. They constitute the great invisible balance of trade. Unlike other forms of trade, the tourist industry produces a dollar which is exchanged only for accommodation and services, rather than for exportable material. The country, in other words gains a dollar and loses nothing."

### Newspaper Has Birthday

The Quebec Chronicle-Telegraph has observed its 175th birthday anniversary. Founded June 21, 1764, as the Quebec Gazette, the newspaper became the Chronicle-Telegraph through amalgamations with the Morning Chronicle in 1874 and the Daily Telegraph in 1925.

### Charge Account For Dog

L. P. Tyndall, Kingston, N.C., says if his dog, Rover, "wasn't reasonable, I wouldn't let him have a charge account, but he has never been a glut-ton." When Rover is hungry he goes to a butcher and barks his choice before a display case. It used to be beef every time, but now he often has a tooth for frankfurters and hamburgers.

It is safe betting that there will be an exceptionally large crop of Georges and Elizabeths baptized in Canada this year.

Chrysanthemum soup, made from chopped petals of the flower, is becoming popular in Japan.

Argentina's grasslands are called pampas from the Indian word for plains.

### Made Transfer Easy

How Wealthy German Got £60,000 In Stocks To England

Where there's a will there's a way. Listen to this story which is going round knowledgeable circles in London of the successful efforts of a wealthy German, now in London, to transfer £60,000 to England by an astute move.

A short time ago a firm of London solicitors received a letter from a German industrialist, asking one of its partners to visit him in Berlin. The expenses of the journey were to be amply defrayed. The solicitor duly arrived and after dinner was asked by the German to transfer through a number of English stock certificates that he had had before the Nazi regime, under which it was impossible to bring them to England. The London solicitor duly examined the certificates and made a note of them. The German then said: "Will you be so kind as to watch me carefully while I put each of these certificates in the fire?" He did so. Next day the solicitor returned to London, followed a few days later by his client, who did not even bring with him so much as an attache case.

In London, at the German's request, the solicitor filed an affidavit proving the destruction of the stock certificates, and, after the necessary lapse of six months, new certificates were issued. The German thus found himself again in possession of his £60,000 but in London! Overseas Daily Mail.

### The Escort Ships

Glasgow And Southampton Do Not Rank With Battle-Cruisers

The two cruisers that escorted the King and Queen on their return voyage in the Empress of Britain are splendid, modern vessels, the Southampton and the Glasgow, commissioned in 1933 and 1934, respectively.

The cruisers are sister vessels of 9,100 tons with a complement of 700 men. They are armed with 12 6-inch guns and eight 4-inch guns, carry two airplanes and can speed 33 knots an hour. They are oil driven. They are not capital ships and do not rank with battle-cruisers or battleships.

During the Great War a light British cruiser called the Glasgow escaped from the disastrous battle of Coronel with the German Von Spee squadron in which two heavy British cruisers were sunk. The Glasgow joined forces with two British battle-cruisers and at the battle of the Falkland Islands a few weeks later destroyed a German light cruiser. The German squadron was wiped out. The admiralty always will keep the name Glasgow well represented in the British navy. - Toronto Star.

England's oldest windmill, built in Outwood in 1665, still is working.

### Books Written By Women

Collector Hopes To Have Every Country In World Represented

Grace Thompson Seton, one-time big game hunter and explorer, is using an interlude and her world-wide friendships with women to hunt out books written by women.

Her goal is to complete for the National Council of Women, of which she is chairman of the committee of letters, a collection of books by women in which every country in the world will be represented. The collection will be known as the Bibliotheca Femina and will not only cover the range of women's particular interests but will contain science, sociology, art and travel treatises.

Canada will be well represented in this unique library as Mrs. Seton has a special kinship with the Dominion. She is the former wife of Ernest Thompson Seton, one-time naturalist to the Government of Manitoba. It is likely one of her own works, "A Woman Tenderfoot in the Rockies," will find a place on the shelves of the Bibliotheca Femina.

Her organization for the library has a world-wide base, she said. Every country has its chairman of letters on whom she relies for a selection of its representative women writers.

From the data she has collected, Mrs. Seton says she has discovered that "whereas the position of women in Europe is declining under the totalitarian governments, it is steadily rising in the Orient." Chinese women particularly, she said, continue to absorb the "eye-opening learning" of the Occident and have come out from the "orchid doors" into the world of business, education and medicine, and now even into the auxiliary army corps.

### Have Good Color Range

Women In New Guinea Tribe Are All Beautiful

Beautiful women whose coloring ranges from brick red to almost white, have been found in a strange tribe just discovered in New Guinea. Reports received in Rabaul declare the people of the district live in a state of constant inter-tribal warfare. The women carry the bones of dead relatives about with them in bags of net on their backs. They do not have to work hard, so just have a good time.

The Spinning spools of the spider are openings to internal silk glands, and the thickness of the thread depends on the number of glands put into action.

## New Light Is Thrown On An Historic Figure By A Well-Known Historian

It is not often that a college magazine has the privilege of publishing original biographical material of the highest importance. In the graduation number of the Royal Military College Review there is a study of one of the greatest and most enigmatic literary and military figures of modern times by one of the world's ranking historians. The author is Lord Tweedsmuir and his subject is Lawrence of Arabia.

The entire career of Lawrence has been regarded as extremely mysterious, and the reason is perhaps because the known facts have been so generally misunderstood and misinterpreted. For the popular mind, the most mysterious section of it has not been the war period but the post-war period when he attempted to drop into obscurity by enlisting as a mechanic in the Air Force.

It will be remembered, after it was discovered that Lawrence, under the name of Aircraftsman Shaw, was in the Air Force, nobody would believe that he was not there for some great and mysterious secret purpose. Eventually he began to bob up—in rumor only—in five parts of the world at once, always on secret missions and usually among native tribesmen.

To the man who was then John Buchan and who is now Canada's Governor-General, Lawrence's Air Force enlistment was no mystery, but it was a cause of considerable concern. To John Buchan, the historian and novelist, Lawrence was much more than a figure of history; he was a personal friend. It is the light that he has been able to throw on this part of Lawrence's career that makes the current issue of the R.M.C. Review of such importance. None can speak with more authority on the matter, since it was Lord Tweedsmuir himself who made the arrangements which enabled Lawrence to return to the Air Force after having been compelled to transfer to the Tank Corps, where he was not happy.

Many, who have not believed that Lawrence enlisted in the humblest capacity under an assumed name for mystery story reasons, have taken it for granted that his enlistment was a dramatization of his protest against British and French treatment of the Arabs.

Lord Tweedsmuir says that the Arab problem had indeed broken his heart, but it had ceased to worry his conscience after the settlement which set up the Arab kingdoms of Iraq and Transjordan. The real reason he entered the Air Force was shattered nerves. Three years of hardships, which included being wounded nine times, four air crashes, and many bouts of fever and dysentery, had taken their toll. He enlisted because of his belief that the only hope of restoring them was to disappear and, under another name, do mechanical work under discipline.

Lawrence's prescription for his own needs was apparently a good one. He eventually did extraordinarily good work in the development of high-speed motor boats for the assistance of seaplanes and of target boats for bombing experiments. Both his physical and nervous health seemed completely restored at the conclusion of his term of service early in 1935. He was looking forward to a short holiday and then to settling down to the literary life, but the motor cycle accident in which he was killed occurred in May of that year.

Lord Tweedsmuir's study, which actually deals more with Lawrence's military tactics than with other aspects of his life, was given as a lecture at the Royal Military College during an official visit in February of the present year. The Review is to be congratulated on having been the first to make it available in printed form and also on a graduation number that is excellent in all its other features. Kingston Whig-Standard.

A boy who wins a spelling bee may grow up and become a business man who doesn't have to depend on his stenographer.

Tin is Bolivia's most important export.

### System Of Registering Seed

#### Present Methods Too Slow, Opinion Of Research Scientist

Dr. C. H. Goulden of the Dominion Rust Research Laboratory, Winnipeg, told the annual convention of the Canadian Seed Growers' Association at Victoria that methods of producing registered seed of new cereal varieties are not satisfactory and laid before delegates a method on which he believed a sound and practical method could be developed.

The senior cereal specialist at the Winnipeg Laboratory said old methods of producing registered seed were good but are found wanting when applied to new varieties in Western Canada where varieties change rapidly.

First they are not sufficiently flexible to enable growers and, especially elite stock growers, or growers of the type of seed used by selected seed growers, to change quickly from one variety to another in accordance with the popular demand for seed.

Secondly, Dr. Goulden said, the method of producing elite stock would be likely to give trouble when applied to the new varieties, and, thirdly, the old methods do not give the plant breeder sufficient opportunity to replace old stocks with new ones that are distinctly superior.

Of the last point, he contended rules and regulations regarding production of registered seed should take this fact into account and provide machinery whereby any new strain that is definitely proved by the plant breeder to be superior, should be used to replace all previous stocks as quickly as possible.

### Foe Of Germs

#### New Drug Smothers Disease Germs In Human Body

The new drug, sulfanilamide, smothers disease germs in the human body.

Discovery of the queer trick by which it does this was reported to the medical section of the American Association for the Advancement of Science, by Doctors Ralph R. Mellon and Lawrence E. Shinn, of Western Pennsylvania hospital, Pittsburgh.

Sulfanilamide, made from a red dye, and first used as a medicine in 1935, has been this century's chief medical sensation. Successively it has become the best medicine for blood poisoning, pneumonia, meningitis, erysipelas, gonorrhea and a dozen other diseases.

All these diseases, the Pittsburgh doctor said, are caused by germs. The germs are not the same. But in the diseases sulfanilamide cures, all the different germs have one common trait.

They get their oxygen from hydrogen peroxide. Buried in body tissues, these virulent organisms manufacture their own hydrogen peroxide with the aid of an enzyme known as catalase. Sulfanilamide, the Pittsburghers said, destroys this enzyme.

### Home Farm Repairs

#### Use Of Old Car Or Truck Wheels For Replacement Purposes

A hint about replacing and repairing machinery after hubs and axles have become worn out comes from the Dominion Experimental Farms in Nova Scotia. On farm implements such as cultivators, ploughs, and wagons where the wheels do not provide power, it is often possible to use old car or truck wheels for replacement purposes. Spindles and hubs can be adapted by welding the spindle to the axle of the implement and welding or bolting the hub to the wheel after doing necessary cutting and fitting. The cost is likely to be less than that of new axles and wheels and in most cases the completed job is more satisfactory. If the wheel required is not too high, it may be possible to use the whole car or truck-wheel, tire and all.

London has just discovered that it has more than 97,000 people over 75 years old.

There were 16,000 deaths from appendicitis recorded in the United States in 1936.

### Has Made Many Trips

#### Commander MacMillan Starts On His 18th Expedition To Arctic

Commander Donald B. MacMillan, veteran explorer, has sailed from Boothbay Harbor, Maine, on his 18th Arctic expedition during which he will investigate reports of vast glaciers in North Greenland that move from 50 to 100 feet in a single day.

Mrs. MacMillan accompanies her husband and a 12-man crew, including nine New England college and preparatory students, on the 6,000-mile trip. They will return Sept. 2.

Through the state department at Washington, MacMillan said, he had obtained from Denmark special permits to do scientific work in North Greenland. Besides glaciology, this study will include ornithology, botany and geology.

Special work also will be performed in measuring the rate and advance of glaciers at 70 degrees North latitude.

In addition to North Greenland, the base ship Bowdoin will visit Labrador and Baffin Land. Provisions, clothing and equipment will be carried for the MacMillan-Moravian school of 40 Eskimo children at Nain, Labrador.

Sailing as first mate is Harold B. Evans of Newton, Mass., a 1938 Dartmouth College graduate, who has been a member of two previous expeditions with MacMillan. The second mate is George F. Murphy, Jr., of Pleasantville, N.Y., and James F. Wiles of Norway, Me., the engineer. It will be the second time each has sailed to the Arctic with the commander.

Dr. Wayne Moulton of Boston is ship's doctor, and John Bert Bangs of Provincetown, Mass., the cook.

### Deplores Isolationism

#### Major Factor Blocking International Co-operation

Speaking at Canton, N.Y., a Canadian educationist foresaw the decline of "isolationism" in North America and advised the development of economic co-operation by Great Britain, Canada and the United States as a substitute.

Professor W. A. Mackintosh, of Queen's University, Kingston, Ont., praised Secretary of State Hull's trade agreement program as the first step in such a co-operative program in a speech prepared for delivery before 150 political leaders and educationists at the Canadian-American Conference.

Mackintosh referred to the drive of the totalitarian countries to dominate world trade and said nations were faced with the choice of achieving economic integration on a co-operative basis or by war.

The speaker blamed "nationalism" as the major factor blocking international economic co-operation and said the development of nationalism was the result of economic adjustments made necessary after the Great War.

A London novelist has a pen in hand for hours, he says, without being able to put a word on paper. We have known this plight, in past offices.

## Many Difficulties Are Met With In Serving Meals On Planes At High Altitudes

### Canada Taking Indian Census

#### Estimated That Indian Population Is Steadily Increasing

Canada is taking a census of her Indian population, according to the Indian Affairs Branch, Department of Mines and Resources, Ottawa. Throughout the Dominion, Indian Agents are gathering vital statistics in their various agencies, while in the outlying district the information is collected by the Royal Canadian Mounted Police, the clergy, traders and others. The Departmental Census of the Indians is taken and published quinquennially, and the last one taken in 1934 accounted for a total Indian population of 112,510. As the Indian population is estimated to be increasing annually at the rate of one per cent., it is estimated that this year's census will show their numbers to be in excess of 118,000.

Of Canada's Indians, some 60,000 depend in whole or in part on farming for a livelihood, and about 50,000 live by hunting, fishing or trapping. The remainder include many who have entered professional and commercial life as well as a large number who might be described as labourers or industrial workers.

More than five million acres of reserve lands have been set apart for the use of Indians in Canada. This system of reserves is designed to protect the Indians from encroachment, and provide a sanctuary where they can develop unmolested until advancing civilization has made possible their absorption into the general body of the citizens. Indians in Canada are the wards of the Canadian Government, and are under the supervision of the Department of Mines and Resources. The activities of the Department as guardians of the Indians include the control of education, health, the development of agriculture and other pursuits among them, the administration of their funds and legal transactions, and the general supervision of their welfare.

### Airplanes Not Overlooked

#### Gideon Society Makes Sure That Passengers Have A Bible

A Gideon Bible was placed in the library used by the King and Queen on board the royal train, it was disclosed in Toronto. During the last year the Gideons placed a total of 10,406 Bibles in various institutions throughout Canada. It was stated in the yearly report. Of this number, 7,298 were distributed among schools, 2,119 in hotels, and the balance in hospitals, sanitariums and penal institutions. They are also placed in all passenger planes of the Trans-Canada Airlines.

New species of oak are being developed rapidly, since the oaks now in existence are so closely related that they intercross.

The flying boat Guba recently left Sydney on a survey flight for the Australian Government to Mombasa in Kenya Colony, Africa. A report on its progress includes the detail that during the flight to Port Hedland, where the Guba was refueled, the cold was so intense that when Captain Russell Rogers, the pilot, tried to eat ice cream for breakfast it was frozen so hard he had to thaw it on a stove.

High altitudes play queer tricks with food, as Brigadier-General Vladimir Kokkinaki also discovered on his flight from Moscow to Canada, where he made a forced landing. After explaining to reporters that he flew at elevations of from 17,000 to 29,300 feet to obtain best weather conditions, he added:

A food that is pleasantly sweet at sea level is unbearably sweet at high altitudes. The chocolate we had in vacuum bottles and the candy we took seemed too sweet to eat. Although we had plenty of food, we were hungry throughout the flight. We had plenty of chicken, but it froze so hard up there that we couldn't cut it with a knife or a hatchet. Apples were frozen so solid they were like stones.

Guests who partook of a "typical airplane meal" at a New York city hotel were told of the difficulties faced by the commissary in providing the 500,000 meals served last year to passengers on United Air Lines planes.

They learned that at 5,000 feet it takes six minutes to boil a three-minute egg; that hot coffee placed in a thermos bottle for an airplane lunch is likely to expand rapidly and blow out the cork; that milk had better be drunk quickly because it curdles almost instantaneously; that within a few minutes freshly baked rolls become dry as a bone, and that inferior fruits and vegetables undergo sad changes in the high altitudes of airplane travel.

Many of these things had been made known by the records of mountain climbers, and progress has been made in overcoming the difficulties of providing food. The passengers in the Atlantic Clipper are not subjected to the discomforts their predecessors in air travel knew. A la carte service is now available on planes, and individual orders can be filled if the roast beef rare or minute steak medium is ordered when the seat reservation is made. And the bark of the hot dog is heard high above the earth. — From the New York Sun.

### Visitors From Many Lands

#### Registrations At Museum At Banff Looks Like League Of Nations Gathering

The wide appeal of Canada's national parks is indicated by registrations at the government museum in Banff and inquiries received at the park information bureau. According to the Department of Mines and Resources, travellers from the United States, Australia, New Zealand, the British Isles, Africa, India, China, Hawaii, Iceland, and Russia were among those who signed the register in the museum during the month of May, while inquiries were received at the information bureau from prospective visitors in the United States, England, Scotland, Australia, Hawaii, China, France, and from various parts of Canada.

Attendance at Banff National Park during May showed a marked increase over the same month a year ago. Automobiles registered as entering the park through the eastern gateway included 4,422 cars and 15,250 passengers, an increase of 1,156 cars and 9,258 passengers over May, 1938.

The person who thinks that his way of doing a thing is the only way of doing it is usually a bore and often a menace.

Banana oil is not made from bananas or any other fruit. It is one of the hundreds of by-products of coal tar.

Nicaragua, which is the largest in area of the Central American republics, ranks third in population.

### ALICE BROOKS MEDALLION EASY TO DO

The modern woman uses her time cleverly—she makes it give her the greatest possible return. That's why she often has a bit of lacey crochet on hand with which to round out leisure moments. People who can make lovely things at practically no cost, you know, are always the envy of those who can't. These lovely round medallions are the perfect answer if you want to make your leisure time yield profit—a scarf for your dresser, a dainty pillow for your boudoir chair, or perhaps you'd like an heirloom cloth to set off your fine china or a spread to proudly show your friends. Whatever it is, these medallions join miraculously into the desired accessory and it's fun joining them. Of course every woman is interested in the cost things made this easy way, rich though they look can be taken care of by the slimmest budget. Just use a mercerized cotton; it sheen gives your work that expensive look. Begin this now. Everyone's doing it! Pattern 6394 contains instructions for making medallions; illustration of them and of stitches; photograph of medallions; materials needed.

To obtain this pattern send 20 cents in coins (stamps cannot be accepted) to Household Arts Department, Winnipeg Newspaper Union, 175 McBurnie Ave. E., Winnipeg.

There is no Alice Brooks pattern book published.

**The World of Wheat**

By H. G. L. STRANGE

Director "Crop Testing Plan"

Many farmers this year will have either plots or small acreages of some of the new varieties of wheat; in Manitoba and Saskatchewan one of the new rust-resistant varieties, i.e. Thatcher, Renown, Apex and Regent; and in Alberta some farmers are trying Thatcher and Renown, and others are changing from Garnet to Red Bobs.

The harvesting of plots or small fields must be done with exceeding care if mixtures are to be avoided. Professional seed growers who are highly experienced in these matters always clean out the binder carefully before each new variety, and then stook the bundles of each variety on its own stubble, leaving a wide space between these stooks and those of other varieties.

Extreme care, too, must be used in threshing. Oats should be threshed before each different variety of wheat. The racks carrying the bundles to the machine should be thoroughly swept out, and then the separator must be carefully cleaned. Even after all this the first few bushels coming from the separator should be discarded.

Most seed growers thresh a few stooks of a new variety by hand on a sheet, or on a verandah, to assure that some seed will be absolutely unadmixed with other varieties.

Following factors have tended to raise price: International Institute forecasts world wheat production will be smaller than last year -- Green fly damaging crops in northern Argentina -- U.K. fair buyer of Argentine corn -- Holland buys South African corn -- Suggest reduction of 10 to 20 per cent in German wheat crop.

Following factors have tended to lower price: Argentina and Australia offering wheat freely -- Increase in average of U.S. private spring and winter estimates -- Dominion Bureau reports condition of wheat above normal and other field crops practically normal -- Argentine corn offered for resale -- North African crops slightly larger than last year.

**Agricultural Report.**

Compiled by Dept. of Agriculture, Edmonton, Alberta, for Period Ending July 10.

Although the major portion of the province has received an abundance of moisture for development of the crop, it is apparent that growth is somewhat later than usual, and the length of the season is now the main factor that will determine the yield of this year's crop in Alberta. Except for the area northwest of Edmonton, and the Peace River district, all divisions report from good to ideal moisture conditions. In the west half of the Grande Prairie district yields are likely to be unsatisfactory unless moisture is received immediately. Good general rains throughout the whole area would be most welcome.

The wheat crop is generally strong

and heading is reported to be just commencing to 65 per cent completed. Hail has occurred at several points, with damage ranging in extent from 10 to 100 per cent. The largest affected area was that between Olds, Didsbury and Drumheller.

The wheat crop is making good progress since the weather has become warmer. For the most part growth is vigorous and stands are good. In some districts heading is just starting, but in the southern districts as much as 65 per cent is headed, while in the Peace River Block 85 to 100 per cent, has reached the head stage. In spite of the ideal moisture conditions which prevailed during June, the cold weather which accompanied the rains has undoubtedly retarded growth, and some fields do not exhibit the development that moisture conditions would seem to warrant. In Peace River Block only showers have been received during the past two weeks, and additional moisture is urgently required.

Coarse grains are satisfactory. Some early varieties of barley are heading. Oats has stood well and is making rapid growth. In the Peace River section coarse grains are inclined to be short. Pastures and forage crops are satisfactory although drought in the early spring has decreased the yield of hay in many cases, particularly the first cutting of Alfalfa. Dry weather is needed for haying in some districts. Insect damage has practically ceased. The cutworm menace in the Peace River area has passed and in the south the vigorous growth of crops has offset any damage caused by grass hoppers. The use of poison bait is continuing, and it is being encouraged to further reduce the number of insects.

Nearly all summerfallowing is completed although in some areas correspondents report that excessive moisture has prevented cultivation of the land.

All reports respecting livestock are bright, and it would appear that live stock is making excellent progress. Pasture conditions continue to improve, except in those areas where rainfall has been somewhat lacking. Young stock in particular is making excellent progress.

**Laying for the EAST**

Not only do Western hens lay for the East to the extent of over 50,000,000 eggs a year, but over 6,000,000 lbs. of them, and their consorts, go East in person to grace the dining tables of Eastern industrial workers.

The East needs the West to feed it. The West needs the East as a market for its produce; so the two work together — the East by spending over \$40,000,000 a year with the Western farmer, and the West — by buying Canadian-built cars.

And that's a point worth remembering, for every car bought in the West helps not only the food-consuming automobile worker — it keeps men working and on payrolls in the rubber, paint, glass, steel, parts, chemicals and many other Eastern industries, to the ultimate advantage of the Westerner himself.

For statistical and further information about this industry, write to Automotive Industries, 1006 Lumsden Building, Toronto.

**Rugby Notes**

Mr. E. P. Foster, M.L.A., will address a Social Credit Rally at Rugby next Thursday, July 27th, at 8 p.m.

The W.I. meeting for July was held at the home of Mrs. Shannon with an attendance of 26 members and visitors. Mrs. C. Young was chosen as our delegate to go to Olds for the F.W.W. on July 31. Articles touching on their particular topics were given by the conveners of Canadianization, Child Welfare and Legislation. Weather permitting, a baby clinic under the direction of Dr. Cody, will be held at the home of Mrs. Wahl on August 16. Mrs. Haener will entertain the W.I. at the August meeting, which will not be held till August 10, on account of F.W.W. at Olds.

Special in Men's Work Pants at Scott's—regular \$1.50 line to clear for only \$1.00. Remember—Scott's!

**Burnside Notes**

Mr. Chas Mardon Jr and J. Gibson spent Sunday with the latter's parents, Mr. and Mrs. Harry Gibson.

Mr. Bill Thompson of Beiseker is spending a week with his parents, Mr. and Mrs. Fred Thompson, here.

There will be a dance in the Lone Pine Hall on Friday evening, July 28, with the Rocky Mountain Rangers furnishing the music.

Mrs. John Brander, of Langdon, Alta., has been visiting her sons, Sandy and John here.

Mr. and Mrs. Fred Fritz of Elstine, have been visiting the latter's father, Mr. Hugh McLean, and other relatives here.

Miss Audrey McNeil of Langdon spent a few days visiting with Mr. and Mrs. Joe Clarke and Jack.

Mr. E. P. Foster, M.L.A. for this district will address a meeting in the Lone Pine Hall on Thursday afternoon, July 27, at 2 p.m.

A marriage of interest to the district took place in Calgary on Friday, June 23, when Miss Rosie Bittner, eldest daughter of Mrs. George Hergert and the late Mr. Chris. Bittner, was united in marriage to Mr. Axel Jensen of Forest Lawn. We extend congratulations and best wishes.

Mrs. W. E. Stiles had as guests last week, her parents Mr. and Mrs. James Dowler of Veteran, her brother Dr. H. A. Dowler of Leader Sask., her sister Mrs. D. M. Mulgrove of Veteran, and her sister Mrs. H. Wallace of Endiang. They were en route to Seattle, Wash., where Dr. Dowler plans on taking post graduate work at the University. They report crop conditions in eastern Alberta the most promising in years.

The Lone Pine W.I. met at the home of Mrs. Enoch Hughes on Thursday afternoon last with a very large attendance of members and visitors. Mrs. Bert Pross took the prize for best decorated year book, Mrs. N. Eckel won the "quiz" contest and Mrs. Harry Richardson the draw. Miss Gwyneth Hughes, one of our clever younger members, won first prize for the best loaf of home made bread. Mrs. Floyd Algrim gave a splendid paper on "Home Economics" which was enjoyed by all. Several snapshots of the ladies in a group were taken after which a dainty lunch was served by the hostesses, Mr. E. Hughes and Mrs. H. J. Richardson.

Just received—at Scott's—a job Lot of Travelling Bags from 50c to \$2.00 each, they're extra good value!

**Melvin Notes.**

Charley Foss, Mr. and Mrs. Dave Jenzen and Kenrald, Messrs. Douglas and John Landeen, returned Sunday from a week's tour in the mountains. They visited Banff, Lake Louise, Yoho Valley and Field, B.C., also many canyons, lakes and falls. Charley, Dave, Douglas and John took a 28 mile hike up the ice fields in B.C. Douglas says "Glaciers are hard on boots," but Charley was wishing for a pair of skates.

**Evangelical Church Notes**

There will be service at the usual time on Sunday morning and one of the ministers now at the Camp will preach for us. The Sunday School will follow as usual.

There will be no evening service, but all are requested to take lunch and go to the camp grounds on the Little Red. We urge that those having cars will make it possible for those without cars to attend the services at the camp. Miss Myrah McVicar will direct the music and Miss Lear will bring the Gospel message both in the afternoon and evening. Rally with us and make this closing day of the camp a really great day. This invitation is for all persons of whatever denomination who may wish to attend. A spiritual feast is assured.

The quarterly official board of this field will convene on Monday evening, July 24, 8 p.m. in the Church Parlors. A full attendance is requested.

**Knox United Church Notes**

Next Sunday evening the service at Knox United Church will be conducted by Rev. I. Burkholder, Colporteur of the Bible Society in Southern Alberta. A hearty welcome is extended to all who care to come, and hear the wonderful story of the Gospel as seen through the experience of a Colporteur.

**St. Anthony's Church Notes.**

A Mission begins Sunday evening at St. Anthony's Catholic Church at 7:30. Rev. Father McGree, C.S.S.R. of Edmonton, who is an outstanding missionary in Western Canada, will explain the doctrine and practices of the Catholic Church.

Services will be held at 7:30 each morning and evening, commencing Sunday July 23, and will close Sunday, July 30. Everyone welcome.

## WORLD HAPPENINGS BRIEFLY TOLD

Welding rails as a safeguard against sabotage of railroads is being tried in India, rail lengths being increased from 36 feet to 120 feet.

One year after Japanese occupation, 7,000 Chinese refugees in the Honan provincial capital still receive their daily bread from Canadian and other foreign missionaries.

An expedition leaving Adelaide to cross the virgin Simpson desert of central Australia expects to return in two months with "enough data to keep scientists busy for years."

Australia's three-year defence program is to be increased from \$63,000,000 to \$73,000,000. Brigadier Geoffrey Street, defence minister, announced.

The London Daily Telegraph published a 24-page supplement with more than 100 photographs describing the royal tour through Canada and United States.

South Africa's police force at the end of last year was smaller in relation to the population than it has been since 1914, yet the number of prosecutions undertaken was second highest in history.

Dominion status should be restored to Newfoundland, the London Evening Standard declared in an editorial terming the island's present form of government a "reproach to the empire."

W. Rupert Davies, publisher of the Kingston Whig-Standard and president of The Canadian Press, was elected vice-chairman of the Empire Press Union at the opening session of the union's annual meeting.

More than \$28,000 reached the Duchess of Gloucester the first night of a drive to raise \$467,000 to continue building London House, student home for young men of the Empire.

### Unique Ceremony

#### Sir Shuldham Redfern Knighted By The King On a Railway Train

Sir Shuldham Redfern, of Ottawa, enjoys the unique distinction on this continent of having been invested personally with a knighthood by the King on a railway train.

When King George gave the customary sword taps on the shoulder and said, "Rise, Sir Shuldham," in the royal train somewhere between Truro, N.S., and Halifax, he conferred triple distinction on the young secretary to Lord Tweedsmuir, Canada's governor-general.

It was the first time that such an honor had been conferred personally on this side of the Atlantic. It was the first time, so far as known, that such a ceremony ever took place aboard a moving train—or any other train for that matter.

As Sir Shuldham is a citizen of Great Britain, he does not fall under the Canadian ban against titles being accepted.

### License To Fish

#### Visitors To National Parks Must Pay For Privilege Of Fishing

After April 1, 1940, visitors to several of Canada's western national parks must have licenses if they want to fish. Provision for licenses was made in an order-in-council published in the Canada Gazette. Parks affected are Jasper, Banff, Waterton Lakes, Yoho and Kootenay.

Originally it was intended to require the licenses this year but the department of mines and resources, which has jurisdiction over national parks, decided to shelve the proposal for one year because railways, hotels, tourist agencies and other interests had distributed advertising saying no fishing licenses were required this year.

Previously no licenses were required but under the new regulation residents of the province in which the parks are located will be required to have licenses costing \$2 a season while to non-residents the cost will be \$5 a season or \$1 a day.

An electrically operated lawn mower invented by a Californian gathers the cut grass into a bag with a vacuum cleaner.

Inspectors caught 91,640 persons travelling without tickets on the Great Indian Peninsular Railway in Bombay in three months of 1939.

### Community Gardens

#### Have Proved Success On Indian Reserves Throughout Canada

Community gardens and farms on Indian reserves in Canada are proving successful both from an economic and health viewpoint, according to the Indian Affairs Branch of the Department of Mines and Resources, Ottawa. By providing a plentiful supply of vegetables, the community gardens have made possible a more varied diet for the Indians which has resulted in a general improvement in their physical condition.

Community gardens on the reserve have also served to stimulate the interest of the Indians in their individual gardens. In one agency, before the advent of the community garden, 3,000 Indians raised only about 2,000 bushels of vegetables in a year. With the introduction of the community garden 4,500 bushels were produced in it the first year and 5,000 bushels of vegetables were grown in the individual gardens of the Indians. Soon the total production of the agency was increased to 20,000 bushels. At first large root cellars were made to store the produce but later the Indians commenced to dig cellars of their own, and the community root houses are now used only for the surplus stores and seed.

The first step in the introduction of community gardens to the Indian reserves is the education of the Indians to the idea. When this has been accomplished the management of the gardens can be entirely the work of the natives. The Chief and Councillors of the tribe act as overseers and appoint suitable Indians as foremen. At the end of the season a committee is formed for the distribution of the crop. A record is kept of the work done by each Indian, and those who do not work do not share in the proceeds.

Community farms so far established are also producing excellent results. The Indians receive food supplies in return for their work on the farm, which help considerably to make them self-supporting.

## HOME SERVICE

### YOU CAN LIVE BETTER WITH PLANNED SPENDING

#### Budget—and Stay Happy

Back from the honeymoon . . . to face money worries, lose their new-found happiness? Not the Smiths. They're on a budget, know how to stretch their modest income to get what they want.

Entertaining, good clothes are important to Jim's career and Sue divides their money to make these things possible.

In renting a home she wisely considered the carfare question, chose a charming spot within walking distance of Jim's job, the shopping district—saving many dollars each month.

The food bill Sue will watch carefully, have healthful, tasty meals, too. If oranges are high, tomato juice gives Vitamin C. Cheese dishes as well as meat have valuable proteins.

Other items Sue plans as cleverly—easy then for the Smiths to dress well, to give nice parties, especially as they'll make major purchases such as coats at sales, fix up a gameroom themselves for inexpensive fun.

Let budgeting solve your own money worries, help you get the most out of life! Our 32-page booklet has a simple budget plan to suit your income. Tells how to buy wisely, keep expenses down, gives ruled pages for a year's accounts.

Send 15c in coins for your copy of "How to Budget and Buy for Better Living" to Home Service Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

In addition to the feature release, the following booklets are also available at 15c each:

- 171—"How to Plant and Care For Your Garden"
- 172—"Steps and Variations"
- 173—"How to Do the Newest Dance"
- 174—"Effective Phrases for All Occasions"
- 175—"How to Travel on Little Money"

### SMARTNESS TO SLENDERIZE YOU

By Anne Adams

Summer entertaining will be something to look forward to . . . when you have a cool, fashionable new dress like this on hand! You'll find that the lines of Anne Adams' easy Pattern 4145 give curves a slimmer look . . . for that bodice fullness under the rounded, lace-trimmed yoke is so graciously soft, while the skirt smooths the hips and flares at hem with most debonair chic. Comfort too is a great consideration . . . note it especially in the ease under the yoke back, and the shaping of the two sleeve versions, one prettily slashed, the other rippling loosely to above the elbow! Delicate prints like that sketched—or plaitone crepes—will add to the illusion of slimmest!

Pattern 4145 is available in women's sizes 36, 38, 40, 42, 44, 46, 48 and 50. Size 36 takes 3½ yards 39 inch fabric and 1½ yards lace.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

### SELECTED RECIPES

#### QUICK CHOP SUEY

- 2 lbs. lean pork, diced
  - 2 tablespoons fat
  - Salt and pepper
  - 1 cup celery chopped
  - 1 green pepper shredded
  - 18 Christie's Soda Wafers
  - 1½ cups meat stock or hot water.
- Brown pork quickly in hot fat in frying pan. Season and add vegetables and cook covered over low flame until tender, adding a little water occasionally to prevent sticking. Crumble Soda Wafers fine and pour over them the hot stock or water. When meat and vegetables are tender combine with Soda Wafers. Serve hot. Six portions.

#### JELLIED VEGETABLE RING

- 1 tablespoon gelatine
- 1 cup cold water
- 1½ cup boiling water
- 3 tablespoons cider vinegar
- 2 tablespoons lemon juice
- 1 cup Crown Brand Corn Syrup
- 1 teaspoon salt
- 1 cup chopped celery
- 1 cup peas
- 1 cup shredded cabbage
- 1 cup diced cucumber
- 1 cup chopped pimiento

Method: Soak gelatine in cold water for five minutes. Dissolve in the boiling water. Add remaining ingredients; mix thoroughly. Turn into ring mould lightly brushed with Mazola. Chill; turn out on large round platter. Surround with cuts of finely sliced meat and halves of hard-boiled eggs. Serve with Boiled Dressing. (Six servings).

#### A Super-Airport

Corporation of the City of London has voted £1,100,000 to turn its site at Fairlop, Essex, into a super-airport. Fairlop may some day replace Croydon and Heston as chief port of arrival for incoming air liners from the continent. It claims freedom from the fog which clamps down on the other airports at times, crippling traffic.

The steel industry consumes 8,000 grams of platinum, valued at \$10,000, annually.

### Good Pasturage

#### Fresh Grass With Sugar Is A Fine Dish For Humans!

Can man live on grass? Mr. J. R. Branson, a retired officer and farmer, has been experimenting. "Seriously you don't mean that you do eat grass?" he was asked in an interview. "I solemnly and seriously do," replied Mr. Branson.

"I'm doing so jolly well on it that I want other people to know. I have learnt from scientists that grass contains all the most valuable vitamins, especially if you get it when the growth is fresh. When I was horse breeding and dairy farming I became fully alive to the efficiency of grass as food stuff. For two years grass has been a staple article of my diet. I am using more and more of it as I go on. And the results are gratifying. I have been an athlete all my life—rugger, rowing, riding—but under normal circumstances age puts a stop to that. Well, I'm rising 67 and although I have not got back all the resiliency of youth, I have more enthusiasm for life than I had as a young man in my prime. I went for a run just for the fun of the thing this morning, and I have cycled over 90 miles on occasions without getting tired.

"There is another aspect of grass eating too—it reduces the cost of living enormously. I eat it raw, but, of course, it must be made appetizing. I eat mine with raw carrots, beetroot, and brown sugar, and it goes down very well. My breakfast this morning came off the Balham bowling green. Young grass is rich in chlorophyll—the stuff they sell in tablets these days. I assure you, and scientific experiments confirm my view, that if we could make grass-eating universal, we could produce four or five times as much natural food per acre as we do now by growing wheat. When you think of the number of people starving in the world at the moment, what enormous benefit grass-eating will be to humanity.

"Yet let me give you one word of warning. Don't rush off and think you can live on grass immediately. You can't do in a moment what I have done in two years. Gently does it. Try some grass in your next salad to begin with."—The Listener (London).

### Animal Husbandry Society

#### Western Section Elects Officers At Annual Meeting At Vancouver

F. M. Baker, Winnipeg, was named president of the Canadian Society of Animal Husbandry, western section, at the annual meeting held in Vancouver in conjunction with the Canadian Society of Technical Agriculturists' annual convention.

K. Rasmussen, of Lethbridge, was elected vice-president, and Thomas Pickersgill, Winnipeg, secretary. Directors named were E. E. Brockelbank, Saskatchewan; M. E. Hartnett, Saskatchewan, and Leslie Hancock, Manitoba.

"Despite the increase of animals on Canadian farms, there is a continuous and steady decline in the number of Canadian veterinarians," Dr. C. R. Duthie, Calgary veterinarian, told delegates to the meeting.

He said that investigation into equine encephalomyelitis, or sleeping sickness amongst horses leads to the belief that they are not the source of infection.

"Some birds and small animals are found to have it," he said, adding the disease might show itself in British Columbia again with the advent of warm weather.

### Increased Longevity

#### Should Have A Steady Influence On National Thought

The Journal of the American Medical Association said editorially that increased longevity of Americans is maturing the national mind and should have a steady influence on future national thought.

"With the decline of the birth rate and the coincidental increase in the number of individuals living to mature and later years," the editorial said, "the character of the national population is being slightly modified."

"Already," the journal said, "industries have modified their views on workers in the older years. It is beginning to be appreciated that those over 40 bring to an industry certain advantages more than compensating for any alleged fault associated with the older years."

### HOME PASTEURIZATION OF MILK

Summer cottagers and residents of the country and small centres, where commercially pasteurized milk is not readily available, are strongly recommended to take precautions to make their milk supply safe. The following directions on home pasteurization will be found useful. They have been prepared by Dr. E. G. Hood, Chief of the Division of Dairy Research of the Dominion Department of Agriculture. The method as outlined employs the same temperatures and time as used in large commercial dairies and where carefully followed will give efficient pasteurization.

#### Equipment—

- (1) Aluminum double boiler with cover.
- (2) Floating Dairy Thermometer. These thermometers are of glass construction and may be purchased from leading dairy supply houses and many hardware stores.

#### Process—

- (1) About half fill the lower portion of the double boiler with water.
- (2) Add the milk to be pasteurized to the upper half of the boiler. A boiler of 2½ quarts capacity will be required to pasteurize 2 quarts of milk. Where larger quantities of milk are to be pasteurized larger boilers must be used.
- (3) Place the thermometer in the milk.
- (4) Place the double boiler with its contents on the stove or heater and examine the thermometer from time to time until a temperature of 140 degrees F. is reached. At this stage it is well to reduce the heat as the water will be hot enough to bring the temperature of the milk up to 145 to 150 degrees. When this temperature is reached the heat should be regulated to maintain it for 30 minutes. It is well to give the milk a vigorous stir each time the thermometer is examined.
- (5) After heating for the required length of time the milk should be immediately covered and cooled to 50 degrees F. or below. In cold weather this may be accomplished by setting the vessel containing the milk in cold water but in the summer months a mixture of ice and water will be found necessary to properly cool the milk.
- (6) Place the boiler containing the cold milk in a refrigerator or a cool cellar and keep there until used. The milk should be used within 24 hours for infant feeding and within 48 hours for adults.
- (7) All milk should be fresh at the time of pasteurization and all containers and equipment coming in contact with the milk should be kept scrupulously clean. This may be accomplished by first washing in cold water, then hot water, and finally scalding. All vessels should be thoroughly dried over the stove and never by means of a cloth.

**Editorial Note:** Readers desiring the complete set of Dr. McCullough's cancer articles at once may secure same by writing to—The Health League of Canada, 165 Bond St., Toronto, Ont.

### Wales Wants Farm Workers

#### Unemployed Men Found Jobs In Various Government Factories

Wales, the country believed to have had the world's greatest unemployment problem ever since the World War, now has a shortage of farm workers. Men who have spent all their working lives on the land have left to find work at better pay in the various Government factories established throughout the principality. Faced with the prospect of reducing their livestock and leaving their land untended, farmers are reported in Cardiff to be considering an appeal to the Ministry of Agriculture to find them men from other districts.

To combat "victimization" by landlords, a lodgers' league has been organized in Bridgend, Wales.

Even jaded appetites cannot resist the rich, golden custards, the cool, inviting blanc manges, the eye-appealing frozen desserts which you can make in such variety and so quickly and easily with Canada Corn Starch. And you simply can't go wrong because Canada Corn Starch never varies in fineness and quality. Ask for it by name.

CHAPTER XIV.—Continued

The old governess stood up. "Oh, my dear! You mustn't—"

"Mustn't what, Penny? Mustn't remember? Then, why did you make me? Why did you make me?" She was trembling and shaking, and the calm and cheer of the pretty room shattered into fragments. "Don't you want me to have any peace?" The greyhound watched her anxiously.

"Oh, my dearie dear! Yes! Yes! But this isn't peace you have now, and I see where you're drifting, and there's no happiness ahead—"

"Happiness? Who's talking about happiness? Peace, I said—peace—the kind I used to have in the hospital when they gave me stuff to kill the pain instead of killing me. Then I learned to drug myself, and you want to take that away, too!" She was crying now, wildly, bitterly.

Miss Pennington put her arms round her. "Hush, poor lamb! Hush! You'll make yourself ill! Dearie, I don't want to torture you but oh, Sarah Lynn, why did you send him away?"

She stopped crying for a moment. "Because he wanted to go, Penny."

"No, no! That's not true! He was crushed and haggard with sorrow—he was—"

"Yes. He was sorry. But I knew him, Penny. I knew what he thought about life and death. He said: 'To be alive, that is nothing, unless life is good.' And he said old and incurable and helpless people ought to be put out of the way of the well and strong. Survival of the fittest; that was what he believed in."

"No, no!" It was Miss Pennington who was weeping now. "He didn't mean—" she was holding her, patting her. "And you're going to be well—"

Sarah Lynn pushed her away. "I

## How Women in Their 40's Can Attract Men

Here's good advice for a woman during her change (usually from 38 to 42), who fears she'll lose her appeal to men, who worries about hot flashes, loss of pep, dizzy spells, upset nerves and moody spells. Just get more fresh air, 8 hrs. sleep and if you need a reliable "WOMAN'S" tonic take Lydia E. Pinkham's Vegetable Compound, made especially for women. It helps Nature build up physical resistance, thus helps give more vivacity to enjoy life and assist calming jittery nerves and those disturbing symptoms that often accompany change of life. Pinkham's is WELL WORTH trying.

knew what he thought. He'd told me over and over. Do you think I wanted his pity and his duty? I wanted him to be free. I want him to be free, always, not even to remember me, not even to be sorry any more." She cried again, then, long and terribly and the governess wrung her hands in helpless grief and fright. After a while Sarah Lynn said in a small, tired voice, "You'd better bathe my eyes, Penny, and powder my nose. They'll be coming home soon. And you'd better be reading Duncan's book."

Duncan Van Doren was the first to return. The dentist had given him an unpleasant afternoon and he was pale and fagged looking. He studied Sarah Lynn's face anxiously. "Sarah Lynn, aren't you feeling well? Is anything the matter? Well, then, did you—did you miss me at all?"

"Yes, I missed you a lot, Duncan," she told him gravely. "And I've been thinking a lot, too. Duncan, if I keep on improving, if I'm able to walk again, and not be such a burden, if you still want me—"

"Sarah Lynn!"

"And if you'll take me away to Detroit and keep me there always, and never let me hear planes going by in the sky—"

Hot color flooded his face; he was shaking and stammering. "Oh, Sarah Lynn! I'll take such care of you! I'll make you happy! I'll make you happy—"

"I'll try to make you happy, too, Duncan," she said levelly. "I'll do my best. I promise."

It was in the dawn, chilly and dark, that Miss Pennington in Mrs. Dana's discarded dressing-gown went padding across the floor to stand beside Sarah Lynn's bed.

"You're not sleeping."

"No, Penny. It doesn't matter."

"Have you pain? Do you feel the brace too much?"

"No," she said again after a pause. "I don't feel—anything."

The governess went down on her plump knees and groped for Sarah Lynn's hand. "Oh, my dearie, why did you do it? Why? Why did you do it?"

It was a long moment before she spoke. "It makes Mother happier than anything else in the world; it pays Duncan back; it pays them both back."

"Ah, but you, Sarah Lynn! You!"

"It doesn't matter, Penny," she laughed. "It matters not—Remember Uncle Lynn's pipe rack? The rest of the verse is silly: master of your fate and captain of your soul. That's sentimental nonsense. But it doesn't matter how strait the gate is. Will you give me a drink of water, please, Penny?"

Miss Pennington brought it and stood waiting while she drank. Tears were running down over her bright, hard cheeks and the tip of her nose was red.

"Thank you, Penny dear," Sarah Lynn said clearly, handing back the glass. "And there's one other reason. Gunnar. If ever he hears—and he will hear, sometime, through Uncle Lynn or Conrad Jordan or Sally Ann—he will think everything is all right. You see, Penny, I want him to be free, free always, the way I knew him. I don't want him to have one thought that's remorseful or sorry. I want him to forget all about me, but if I ever do come into his mind I want him to think: 'So! She married the first suitor! She lives the soft life, safe and dull. It is finished.' And I'm going to forget him, too, Penny. I'm going to—"

She broke off with a muffled cry and put her hands over her ears.

Miss Pennington stood listening. There was the throbbing of a motor far above them.

## CHAPTER XV.

For once Mrs. Edwin Dana defeated the press. The betrothal of her daughter to the son of her dearest friend was kept an absolute secret. Tenderly triumphant letters went from Danavale to Detroit and Detroit to Danavale, but the colony itself had only surmises and the public was in ignorance.

It was to be a rather long engagement—until Sarah Lynn was walking normally—and the wedding would be the simplest and quietest possible. She fed her fancy upon that. There had been enough publicity before to pollute a reticent lifetime. She shaped the notice she herself would send to the papers: "Miss Sarah

Each pad will kill flies all day and every day for three weeks.  
3 pads in each packet.  
10 CENTS PER PACKET  
at Druggists, Grocers, General Stores.  
WHY PAY MORE?  
THE WILSON FLY PAD CO., Hamilton, Ont.

Lynn Dana, daughter of Mr. and Mrs. Edwin Dana of Danavale, and Mr. Duncan Van Doren of Detroit were quietly married at four o'clock on the afternoon of Wednesday, the seventh, at the family home on Loma Vista drive, with only the immediate relatives present. Mr. and Mrs. Van Doren sailed the following day for the Orient and after a few months of travel will make their home in Detroit.

The vision of it in type restored the years that the locusts had eaten.

Sarah Lynn travelled to new milestones of progress and left them behind. She could sit up for half the day; she could walk about the room; she could walk about the garden; she could be taken for gentle rides in the family motor-car. On one of the first drives her mother took her to call upon Lynn Dana. His chair was on the lawn in the bright winter sunshine and the elderly chauffeur drove the machine close so that they might talk without Sarah Lynn's leaving the car. Mrs. Dana did most of the chatting. Then they went to see dear Aunt Helena where Duncan met them for tea.

Sally Ann came back but she stayed in San Francisco and came down for a day or two at a time, only.

Lynn Dana had her for luncheon with Mary Dana Webster and Conrad Jordan.

"What do you hear from Gunnar?" the travelling cousin asked the flier once.

"Nothing."

Sally Ann stared.

He shrugged. "He never writes, and I don't. I had a brief and very formal note of thanks after he left."

"Then—he doesn't know about Sarah Lynn's recovery?"

"Not from me. He clearly wanted to make a clean break. What point would there be in telling him now? She's going to marry Van Doren."

"Besides," Mary Dana Webster said crisply, "to rush back now when she's well, after bolting when it seemed hopeless, wouldn't be very handsome, would it?"

Gunnar Thorwald's only defender was silent.

Sally Ann said: "I'm off to New York in a week or so. I've seen Sarah Lynn, and that's what I came home for. I've seen her four times—and I haven't seen her at all. Duncan was there, or Cousin Adelaide, but even if I'd had her alone I doubt if I could have punctured that—that cellophane calm which covers her!"

The aviator said, "Why try?"

"Yes, why?" the man in the wheeled-chair wanted to know. "Good Lord, Sally Ann, if she has achieved peace—if she's happy—"

"Peace?"

"Happy?" The two women scorned him hotly. "She's like a sleep-walker," Mary said. "She's deliberately doped herself with Duncan and Detroit; that's my analysis. She has simply ceased to matter to herself; she simply doesn't count—and she doesn't care and it's too hideously cruel and I could howl my head off!" She wiped away angry tears.

Jens, the valet, came upstairs at his slow and lumbering tread. Miss Pennington was calling, and it was very, very important, and she must see Mr. Dana immediately.

"Send her up, of course, Jens," Lynn Dana said, but she passed the man-servant in the doorway.

Her cheeks were pale and she was out of breath. "Oh, Mr. Dana. I found him on the drive—coming to the house—I made him come here first—I made him—he doesn't know—"

There was the sound of someone taking the stairs in bounds and suddenly the little old Hank Dana house was full of drama and confusion and

alarm and Gunnar Thorwald was among them.

He didn't seem real. He didn't seem to be a living person but a presence which they had conjured up out of their grief and rebellion. He was utterly white and his eyes were bluer by contrast, and he was thin and gaunt. He looked older and he seemed taller, so tall that he towered over them, and his harsh and urgent youth made them seem soft and safe and middle-aged.

(To Be Continued)

## The Royal Barge

Is Quite Different From Small Pinnace Used By Admirals

Mention of the fact that the King and Queen were unable to use their "barge" when they were embarking on the Empress of Britain may have puzzled some people as to what kind of a "barge" it was. The popular conception of a barge is a flat-bottomed boat used on canals and rivers and along the coast, and usually towed by a horse, or strung together behind a tug.

But there are barges and barges. There is a royal barge, and a royal bargeman who wears a beautiful scarlet uniform with a jockey-like cap who navigates the craft on the few occasions the King and Queen use it. It is propelled by oarsmen. In appearance it is somewhat like a Venetian gondola. The last time it was used was 20 years ago when King George V. and Queen Mary took part in a naval pageant on the Thames in celebration of peace. It is permanently housed on the Thames near Windsor Castle. Back in Tudor days Henry VIII., Queen Elizabeth and other monarchs made constant use of the state barge on the Thames.

Every admiral has his "barge," too for taking him from ship to ship and from ship to shore and back. It is really a steam pinnace small enough to be carried aboard but large enough to carry 30 or 40 men. That was the kind of "barge" Their Majesties were to have used but the water was too rough for such a small vessel.—St. Thomas Times-Journal.

## Just Another Puzzle

Why England Is Strong On Garden Parties And Lyric Poetry

Naturally, the royal visit to Charlottetown, Prince Edward Island, was marked by a garden party; and, naturally, it rained. After a few minutes everybody ran to cover.

If there is reason and meaning in history, how does it come about that the garden party as an institution should flourish precisely in Great Britain, where it always rains, or nearly always? It is a climate in which one can understand the Dickens love for inns and old farm kitchens and drawn blinds and other cozy interiors; but it is hardly the climate favorable to silk hats and striped trousers under the open sky.

For that matter, there are scholars who have never been able to understand why England with its fogs and chills and meager supply of sunshine should be the home of the greatest lyric poetry in modern times.—New York Times.

## Specimens Of Wild Life

Will Be Collected In Saskatchewan For Eastern Museums

Three Toronto district youths are in Saskatchewan for a three-month tour of that province collecting wild life for several museums and universities in Canada and the United States.

The boys, Farley Mowat, 19; Harris Hoarde, 20, of Richmond Hill, and Frank Banfield, 21, will be joined in Saskatchewan by Frank Farley, a western ornithologist.

They plan to survey unworked areas of the province from Prince Albert national park to the United States border.

## Hens Pay College Fees

Bob Clymer, of Columbus, Ohio, owes four years in college to 300 leghorn hens. On their present production basis, the hens will have laid approximately 276,110 eggs during Clymer's four years in the agricultural college at Ohio State University. He has been raising the chickens as a business enterprise to finance his education.

The pages of a new book for children showing animals can be folded to form a circus revolving on a wooden pedestal.

## Not A Military Title

Man Presented To Belgian King Was Just Political General

Horace F. Reber, in a letter to the Philadelphia Inquirer, says:

This visit of the King and Queen of England to Canada and this country reminds me of a visit of the King and Queen of Belgium to this country a little less than two decades ago. The royal party in a special train stopped at Harrisburg to pay their respects to the Capitol Hill officials. There was an argument between Governor William Cameron Sprout and his Auditor-General Charles A. Snyder as to who should receive royalty first.

Governor Sprout contended that Schuylkill county's Auditor-General was the Beau Brummell on the Hill; Snyder contended that Sprout was the big "IT", and it was up to the Governor to receive the King.

It was decided that Governor Sprout receive His Majesty first, followed by introduction to General Snyder. Hearing the term "General" the King pricked his ears and immediately wanted to know on what field of battle "General" Snyder had won his title and shoulder straps. It was only in Schuylkill county's political battles that Snyder had been involved.

## Clever With Whips

Young Man Using Them To Finance Trip Across Australia

With a kit that consists mainly of 50 Australian stickwhips, a young man of 24, Ian Westbrook, has begun a two-year horse ride that will carry him across the vast Australian continent. The whips are the means by which he hopes to finance the journey, though he is an adept at lighting sketches and will fall back on this art if his whip cracking demonstrations prove inadequate.

Westbrook can crack eight whips at a time with uncommon and amazing dexterity. His biggest whip is 60 feet long.

Mounted on a bay horse with a sheep dog trotting behind him, Westbrook rode out from Sydney, expecting to cover 10,000 miles before his return.

To a crowd seeing him off, his farewell remark was, "There's no trouble about selling sketches if you get a good likeness. Anyway, there isn't much face to draw when you get into the beard belt."

## Made Clocks Accurate

Use of the adjustable length pendulum in the latter part of the 17th century made possible clocks of accuracy. Later it was discovered that gravitational pull was not constant on the earth's surface and pendulum clocks were found to run slower at the earth's poles.

## Stop the Itch of Insect Bites—Heat Rash

For quick relief from itching of insect bites, heat rash, athlete's foot, eczema and other externally caused skin troubles, use world-famous, cooling, antiseptic, liquid, D. D. D. Prescription—Grazelins, Stables. Soothes irritation and quickly stops intense itching. See trial bottle present, or money back. Ask your druggist today for D. D. D. PRESCRIPTION.
